Indian River Wild and Scenic River Corridor

Boundary Description

The Indian River corridor extends through the Hiawatha National Forest in Michigan from Indian Lake in section 25 T42N-R17W through T43N-R17W, T44N-R17W, and T44N-R18W, in Schoolcraft County, and continues through T44N-R19W, to the river headwaters in section 17 of T45N-R19W at Hovey Lake in Alger County, Michigan Meridian.

The corridor boundary is described by a list of nodal coordinates associated with points of directional change in the boundary line, and intersection and coincidence of the line with other line features such as timber management unit boundaries, roads, and section lines. Textual descriptions are given of topologically related features for clarity, and practical location. The actual locations of the calls on the ground supersede the coordinate pair locations, if they differ.

The coordinates in the description are listed as "X-coordinate Y-coordinate" and are in North American Datum 1983, State Plane Coordinate System, with metric units in meters. Coordinates given for nodes representing corners on section, quarter section, sixteenth and sixty-fourth section lines are approximate locations derived from the Hiawatha National Forest GIS data layer used to map the boundary of the corridor. These coordinate pair locations are not intended to control the legal location of the section, quarter section, or sixteenth section corners or lines; such locations must be established by legal survey.

The description of the corridor boundary begins near the mouth of the river, following the westerly bank northerly to the headwaters, then returning on the easterly bank southerly to the mouth and the point of beginning.

Beginning at the east sixteenth corner common to sections 24 and 25, T42N-R17W;
