

evaluated the potential effects of four alternatives, including No Action and three action alternatives. The proposed action addresses the need to: manage vegetation to provide forest products, to reduce hazardous fuels on forest lands and adjacent to private property, reduce effects to wild and scenic rivers, reduce effects to steep slopes, reduce effects to wilderness characteristics, improve watershed condition through changes to access management, treatment of road and trail stream crossings. Alternatives were developed based on the potential effects to: old growth and old growth-dependent species; watershed and fish habitat, visual resources from timber harvest, new road construction, mechanical treatment in Forest Plan Management Area 20, and landscape prescribed burning.

Expected Impacts

Preliminary significant impacts to be evaluated included: effects to old growth and cumulative effects.
