**BOUNDARY DESCRIPTION
CLACKAMAS WILD AND SCENIC RIVER
CLACKAMAS COUNTY, OREGON**

This legal description and the attached map dated 07/21/2021 of the Clackamas Wild and Scenic River are on file in the office of the Chief of the USDA Forest Service and are as generally described in Public Law 100-557. This description along with the final map shall be considered as whole and complete per the original legislation creating this wild and scenic river area and together they shall govern all boundaries of this wild and scenic river.

The mapping base is the U.S. Forest Service (USFS) Land Status Record System and corporate data sets. Except where specified, all courses, distances, elevations, and latitudes and longitudes in this document are derived from Geographic Information Systems data, based on the North American Datum of 1983 and the National Geodetic Vertical Datum of 1929. Latitudes and longitudes (DD° MM' SS.s") reported for angle points in this description are provided to assist in the location of the described features. Where called for, physical features will control over courses and distances, and latitude and longitude.

Lines and corners of the Public Land Survey System (PLSS) shall determine the actual location of the portions of the boundary so described. All corner points and lines of the PLSS referenced in this description are according to the latest official survey unless otherwise specified. Where the boundary is described as a topographic feature, the actual location of the feature will control the boundary and not the approximate courses herein. Where the boundary is described by a road, the center line of the road will be the "as travelled" center line for USFS roads and the right-of-way center line for all other public roads, as of the date of the Act.

Public Law 100-557 designated a 47-mile segment of the Clackamas River from Big Springs to Big Cliff. The most accurate mapping information now available shows that legislated river segment to be 48.8 river miles. The herein described designated corridor has a calculated total area of 15,620 acres (9,160 acres of which lies within the recreational segments), for an average of 320 acres per river mile.
