BOUNDARY DESCRIPTION NORTH FORK CROOKED WILD AND SCENIC RIVER CROOK COUNTY, OREGON

This legal description and the attached map dated June 21, 2011, of the North Fork Crooked Wild and Scenic River are on file in the office of the Director for BLM and the Chief of the USDA Forest Service and are as generally described in Public Law 100-557. Where the boundary is described as following a topographical feature, the actual location of the feature will control the approximate course identifying that part of said boundary. Township, and Range lines, as well as Section and subdivisional corners established under the United States Public Land Survey System, shall determine the actual location of these portions of the boundary so described. Township, range and section captions are descriptive and not exclusive. Section subdivision lines and corners will be established under the rules of the United States Public Land Survey System and the current "Manual of Instructions".

The mapping base for the North Fork Crooked Wild and Scenic River is the Bureau of Land Management's GCDB, the USFS Land Status Record System and other local corporate data sets. Where a Point is "referenced" by a monument, the feature will control the location and the monument will serve to reference the description only. If said monument is lost, the position will be re-established by the controlling features before the use of coordinate values.

All monuments set for this description were marked with a point number and "NFCR WSR 1993". The point number on the monument does not necessarily follow the numbering system in the description. The monuments were steel rebar, 5/8 inch diameter, driven flush or to the point of refusal and surmounted by a 2 1/2 inch diameter aluminum cap. A steel fence post was placed alongside each monument.

Coordinates (Latitude and Longitude) were derived by differentially corrected mapping grade GPS (plus or minus two to five meter accuracy) and should be used only as a guide in locating any physical features described. Coordinates are approximate; any positioning technique that creates a true location within 10 feet horizontal of the stated coordinate is acceptable for the cited coordinate position. The true boundary location of any coordinate position relative to a cited feature or boundary shall be the intersection of that feature with a line normal to the feature passing through the coordinate.

The bearing and distances shown in the description are True Bearings and Ground Distances. Coordinate values are Geographic (DD.MM.SS.ss) and are based on the North American Datum of 1983. The North Fork Crooked Wild and Scenic River covers approximately 10,700 acres, more or less.

Public Law 100-557 designated a 32.3 - mile segment of the North Fork Crooked River from its source at Williams Prairie to one mile from it's confluence with the Crooked River as a Wild and Scenic River. The most accurate mapping information now available shows that legislated river segment to be 33.7 river miles. The herein described designated corridor has a calculated total area of 10,700 acres, for an average of 317.5 acres per river mile.
