I hereby certify and accept the final map and legal boundary description of the Lower White River Wilderness within the jurisdiction of Oregon State Office as entered into the National Wilderness Preservation System by the Omnibus Public Land Management Act of 2009, Public Law No. 111-11, March 30, 2009.

BOUNDARY DESCRIPTION
LOWER WHITE RIVER WILDERNESS

This legal description and the attached map dated July 12, 2022, of the Lower White River Wilderness are on file in the office of the Chief of the USDA Forest Service and as generally described in Public Law 111-11. This description, along with the final map, shall be considered as whole and complete per the original legislation creating this wilderness area and together they shall govern all boundaries of this wilderness.

The mapping base is the U.S. Forest Service (USFS) Land Status Record System and corporate data sets. Where the wilderness boundaries are coincident with Northwest Forest Plan (NWFP) boundaries, USFS data from the 2002 Land Use Allocation (LUA) database was used as the best available evidence of the intent of the legislative map. Except where specified, all courses, distances, and latitudes and longitudes in this document are derived from Geographic Information Systems (GIS) data, based on the North American Datum of 1983. Latitudes and longitudes (DD° MM' SS.s") reported for angle points in this description are provided to assist in the location of the described features. Where called for, physical features will control over courses and distances, and latitude and longitude.

Lines and corners of the Public Land Survey System (PLSS) shall determine the actual location of the portions of the boundary so described. All corner points and lines of the PLSS referenced in this description are according to the latest official survey. Where the boundary is described as a topographic feature, the actual location of the feature will control the boundary and not the approximate courses herein. Where the boundary is described by a road, the center line of the road will be the "as travelled" center line for USFS roads and the right-of-way center line for all other public roads, as of the date of the Act.

USFS jurisdiction acreage is GIS calculated acreage based the physical features, bearings, distances, official records, and latitudes and longitudes contained within. BLM jurisdiction acreage is based on official land record acreage minus the GIS calculated portion in section 9 for the road as described.
