

SALMON-HUCKLEBERRY WILDERNESS

Mt. Hood National Forest

I hereby certify that the legal boundary description and map herewith represent the location of the boundary of the Salmon-Huckleberry Wilderness on the Mt. Hood National Forest as entered into the National Wilderness Preservation System by the Act of June 26, 1984.

Signed

2/26/87

Richard A. Torrence
for JAMES F. TORRENCE
Regional Forester

Definition of Intent

The legal description of the Salmon-Huckleberry Wilderness is as shown on the map dated September 1986 on file in the office of the Chief of the USDA Forest Service and as generally described in Public Law 98-328. The approximate courses of the map boundaries are identified in the following legal description. Where the boundary is described as following a topographical feature, the actual location of the feature will control the approximate course identifying that part of said boundary. Unless specified in the description, calls to a stream shall be to the thread and calls to a ridge shall be to the crest. Section, Township, and Range lines, and Section corners established by the United States Public Land Survey, shall determine the actual location of these portions of the boundary so described.

Section subdivision lines and corners will be established under the rules of the United States Public Land Survey.

The data base for the Salmon-Huckleberry Wilderness is a series of quadrangle maps published by the United States Geological Survey as identified on the attached index map. The various boundaries were marked on the map and the information was collected with a Hewlett-Packard 9020 Interactive Graphics System. The data is published as the attached metes and bounds description. Courses in the description are shown as grid bearings and grid distances.

SALMON-HUCKLEBERRY WILDERNESS BOUNDARY DESCRIPTION

All bearings and distances shown in the following description are based on the Washington State Plane coordinate grid system, North Zone. International, State, Indian Reservation, National Park, Mineral Claim, or Sectional land boundaries have been included although record bearing, distance, and monuments will prevail.
