

United States Department of Agriculture  
Forest Service

# ***The National Land Cover Database (NLCD) 2011 Percent Tree Canopy Cover***

*The National Land Cover Database 2011 percent tree canopy cover layer was created by the USDA Forest Service using 7,615 Landsat scenes. Reference data was collected at over 67,000 locations. Predictor layers included Landsat imagery, spectral derivatives, and other ancillary datasets. Modeling was carried out using the random forests algorithm.*
